FUTURE READY.

KEY FEATURES

High Performance Processors

Supports latest generation Intel® Xeon® / AMD EPYC™ processors for demanding workloads.

Scalable Memory

Supports high-capacity ECC DDR4 / DDR5 memory with multiple expansion options.

Flexible Storage Options

Supports HDD, SSD, NVMe and RAID configurations for enhanced performance and data protection.

Multiple Form Factors

Available in Tower, Rackmount (1U/2U/4U) and custom configurations to suit your infrastructure needs.

Remote Management

IPMI / iDRAC / similar management options for easy monitoring and administration.

Advanced Connectivity

Multiple LAN ports with high-speed networking options for seamless integration.

Enhanced Security

TPM, secure boot and hardware-level security features to protect your data.

Enterprise-Grade Reliability

Designed for 24/7 operation with robust hardware and thermal design.

Wide Application Support

Ideal for virtualization, data storage, backup, cloud applications, database management, and enterprise software.

PRODUCT SERIES

TOWER SERVER

Ideal for small and medium businesses with powerful performance and expandability.

RACK SERVER

Space-efficient and high-performance for enterprise environments.

CUSTOM SOLUTIONS

Tailored configurations to meet specific business and infrastructure needs.
